

MARKET COMMUNICATION

YOUR CAPITAL IS AT RISK

INVESTMENT OBJECTIVE

The portfolio looks to deliver long-term capital growth with a mix of lower risk assets such as utilities, and higher risk assets such technology infrastructure stocks. The over all risk rating is in the higher risk portion of equity markets. The model is designed to identify not only attractive traditional infrastructure companies, but also companies essential to the function of a modern data and digitally driven economy with the potential to outperform both other infrastructure strategies and the broader market over the long term.

PORTFOLIO RISK RATING

Risk is based on the standard deviation of returns. Standard deviation measures the dispersion of returns around the average (i.e. volatility. High volatility does not necessarily result in higher returns).

INVESTMENT STRATEGY

The portfolio manager will invest in a diversified portfolio of North American focused large cap equities with a minimum market capitalisation of \$1bl. Position sizes will vary from a minimum of 0.3% to maximum of 10%. The allocations is divided into nine subsectors with a maximum subsector holding of 35%. Sub-sectors range from traditional infrastructure such as utilities/electricity generators, telecom, and pipelines to more technologically focused infrastructure such as data centers data center infrastructure, cybersecurity/mission-critical software, manufacturers of electrical power equipment and E&C companies providing critical design and installation services. The portfolio aims to provide superior returns when compared to the STOXX® Global Broad Infrastructure Index (NFRA).

BENCHMARK WEIGHTINGS

RISK WARNINGS

All investors should carefully consider an investment portfolio's investment objectives, investment composition, instruments, risk factors and fees before investing. If you are in any doubt, you should obtain independent investment advice.

Past performance of a model portfolio is not a guide to future performance of an investment portfolio.

The value of investments may go down as well as up and any income generated by investments is not guaranteed and may fluctuate. You may receive back less than the amount that you invested.

IMPORTANT NOTE

Please note that:

Neither a model portfolio, nor the STOXX[®] Global Broad Infrastructure Index, reflect real life transaction charges arising from dealing in securities or any fees of custodians (if any) or of a brokerage platform (if any).

We may hold notional cash holdings from time to time in the model portfolio whereas the STOXX[®] Global Broad Infrastructure Index does not; a model portfolio is a form of simulated past performance which may lead to differences in performance when compared to portfolios of securities managed for clients following the model portfolio due to timing issues relating to implementation or the effects of transaction costs or other factors.

The model portfolio may hold notional holdings of bonds whereas the STOXX[®] Global Broad Infrastructure Index not.
