About Zodiac FX

Zodiac FX is an independent foreign exchange broker that allows you to send payments safely and easily worldwide. We specialise in providing companies and private individuals with international currency transfers in a secure, fast and cost-effective way.

Zodiac FX was founded in 2019 by experienced currency traders at Zodiac Partners. We saw that our clients were mainly using their banks for FX and transfers and that they were inherently worried to move away from this due to the complicated nature of international banking. We knew that we could improve the clients experience and save them money.

In order to do this, we teamed up with Currency Cloud and developed the Zodiac FX platform.

Zodiac FX offers: Currency exchange, Payments, Mass payment solutions, Collection Accounts, Treasury functions and more. Users who are confident and familiar with the system can log in and electronically go about their business. If you are worried about the receipt of a transfer or the execution of a trade, then you can call us and we can help or update you.

Zodiac FX platform has been developed to help clients with real world problems and we feel that is genuinely disruptive technology.

Collection Accounts

If you are a private individual or an organisation seeking to repatriate US or Euro earnings to the UK, leverage our technology to prevent long delays or high charges by using a Collection Account.

WHAT ARE COLLECTION ACCOUNTS AND WHY DO I NEED ONE?

There are often issues when dealing with some US banks. They may not be set up to action international transfers or they may not be inclined to do so. The result is poor rates, additional costs, or the complete inability to send money overseas.

Bring US Dollars to the UK via a Collection Account.

Private individuals carrying out transactions in the US can also benefit from the easy use and cost savings inherent in this technology. Your Collection Account is set up locally within the US so that payments can be sent bank to bank within the country itself. Think of this as being similar to BACS, CHAPS for faster payments in the UK and SEPA for Euro payments. Zodiac FX will then sweep the Dollars out of the account and into your UK holding account.

It's that simple, it speeds up your capital flows and reduces cost.

We also offer collection accounts in Europe where we can accept local Euro payments for transfer elsewhere in the world.

In Summary if you're a private individual or an organisation seeking US earnings sent to the UK then using a Collection Account is the way forward, please contact us for more information.
